THE PROGRESSIVE FARMER SAYS for the land sake sow CRIMSON CLOVER. Now to help out this suggestion we have gotten in a supply of seed and inoculation, all at a low price.

A crop of crimson clover to plow under for every acre of corn to be planted next spring; and a winter cover crop to be grazed in early spring will greatly improve your land and stock and add greatly to your corn pile in the fall. Just try one acre and be surprised as all have that has tried it.

If can't do better sow winter rye or oats and don't neglect the pig crop rape. Where you buy any the above seeds of us or not, sow at least a garden spot and you will sow more next fall.

I further suggest watch the men that has tried clovers. Read the Progressive Farmer.
